a. Install Kobo on your android device

b. Set your login credentials

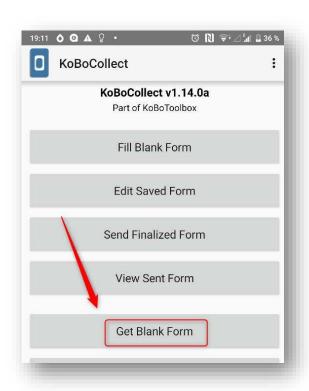

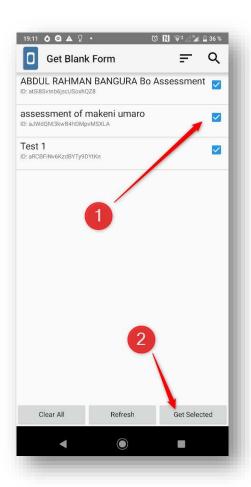

- 1: Set server URL https://kc.humanitarianresponse.info
- 2: Set your username
- 3: Set your password

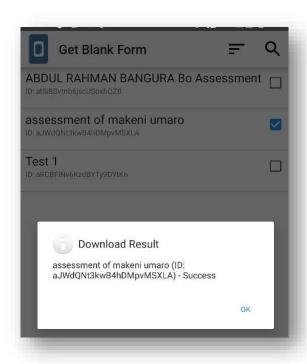

c. Download form

You will be asked to fill your credentials, put your username and your password and press OK.

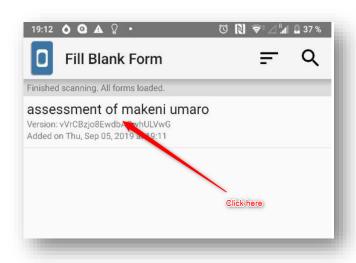

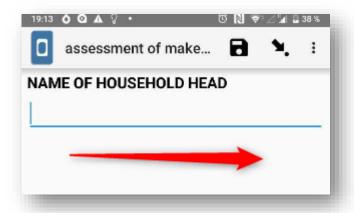

- 1: Select your form
- 2: Download the selected form

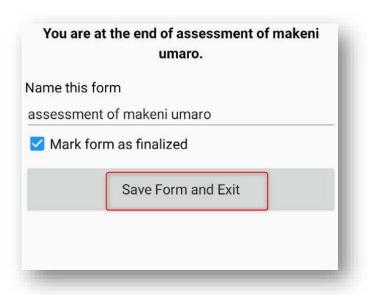

d. Open, fill form and submit

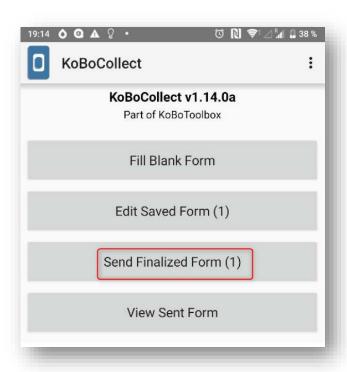

Swipe to move to the next question

e. Send submitted data to the server

- 3. Connect Excel to Kobo to get data automatically
 - a. Login to kobo and get token

A token is an identifier that allows you to uniquely identify your account to make consultation or editing requests on a platform without having to enter your password and login at each request.

It should not be shared with external persons and should be confidential.

After logging in go to the link https://kobo.humanitarianresponse.info/token/?format=json

Copy the code you token and keep it somewhere

- a. Download Postman to test the APIs
 - i. Download and install

Get Postman for Windows Join 6 million developers and download the **ONLY** complete API Development Environment. Download Version 7.1.1 | Release Notes | Product Roadmap Not your OS? Download for macOS or Linux (x32 / x64)

Go to the link https://www.getpostman.com/downloads/ and download the setup

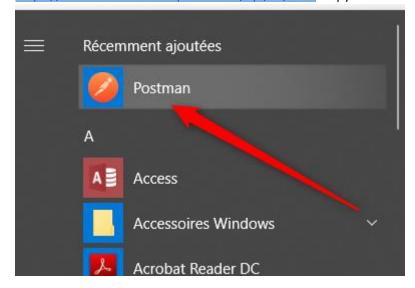

ii. Testing the Kobo API

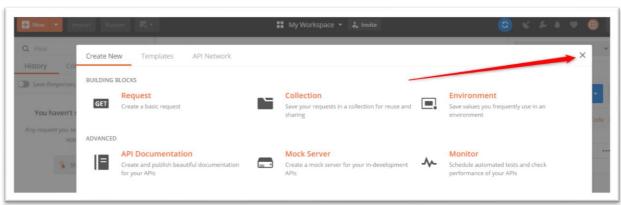

Go to this link to find the API Endpoints https://kc.humanitarianresponse.info/api/v1/

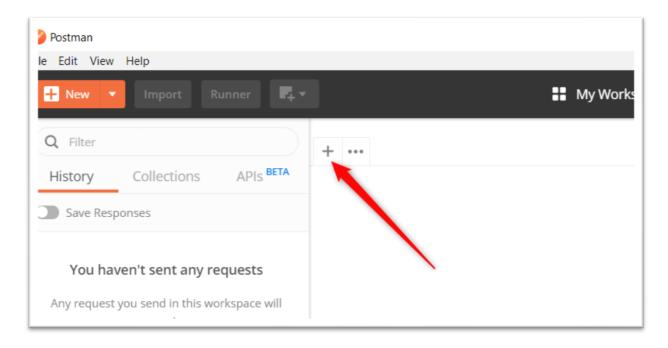

iii. Test the API recovery of submitted data on Kobo

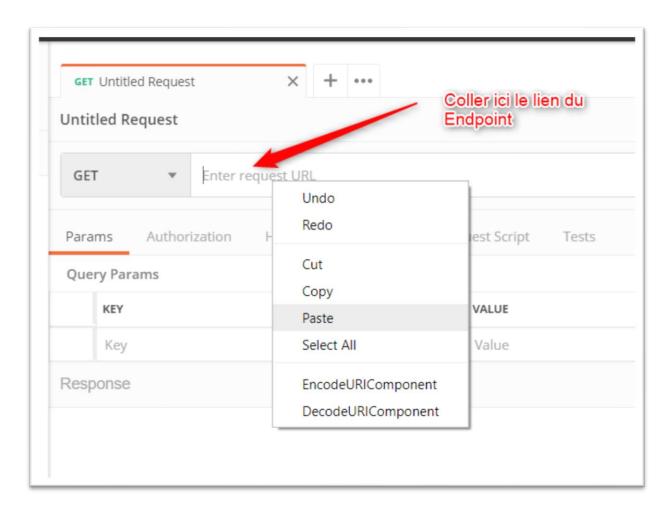

Here is the Endpoint for the data submitted on kobo

https://kc.humanitarianresponse.info/api/v1/data copy the link of this Endpoint and open Postman

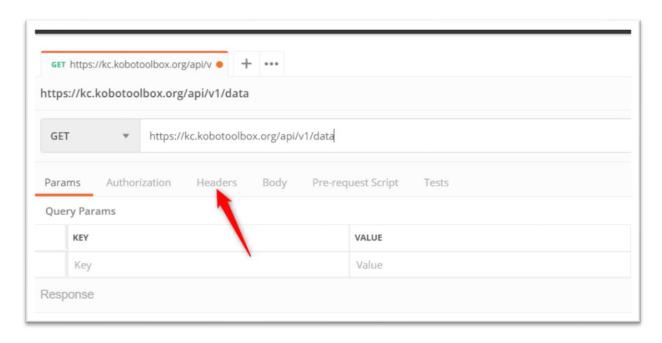

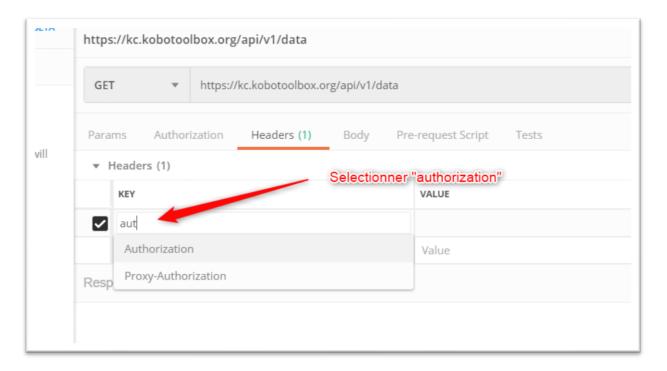

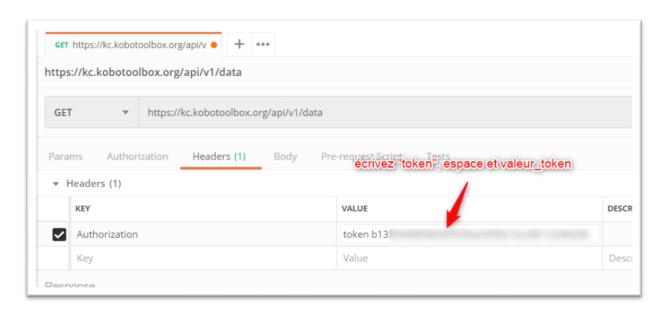

Paste the link

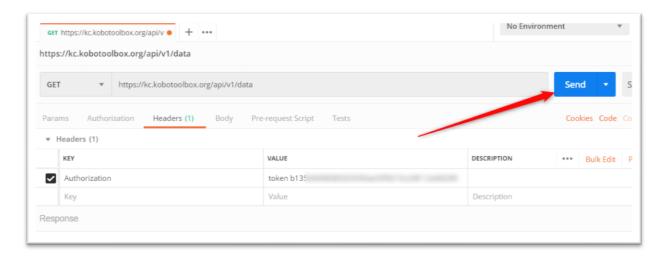

Click on header

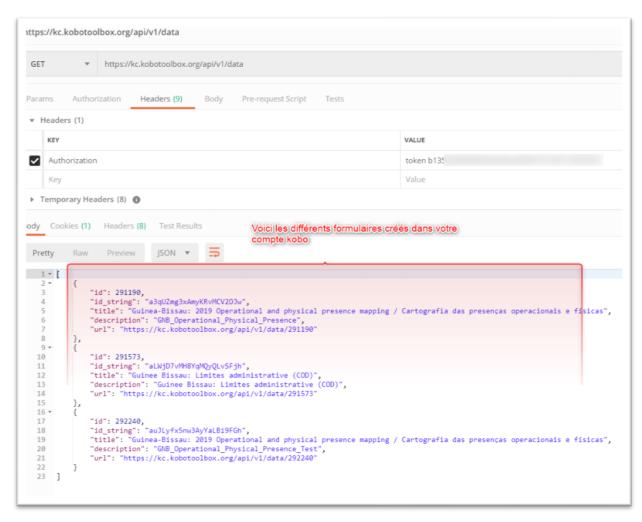

Start typing aut and select "authorization"

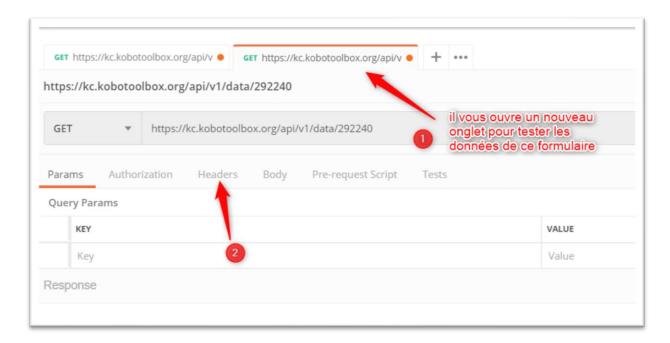

Write "token" "space" and "the value of token"

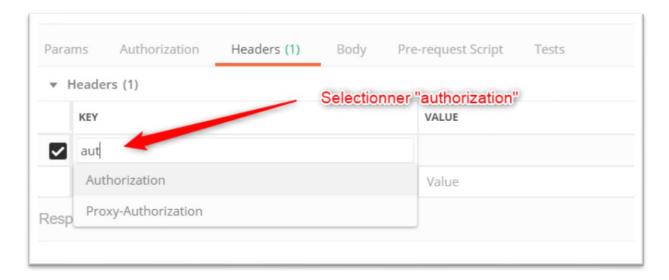

You will see the different forms created in your kobo account

Click on one of these links to access to the data of one form

Open a new tab to test the data of the form

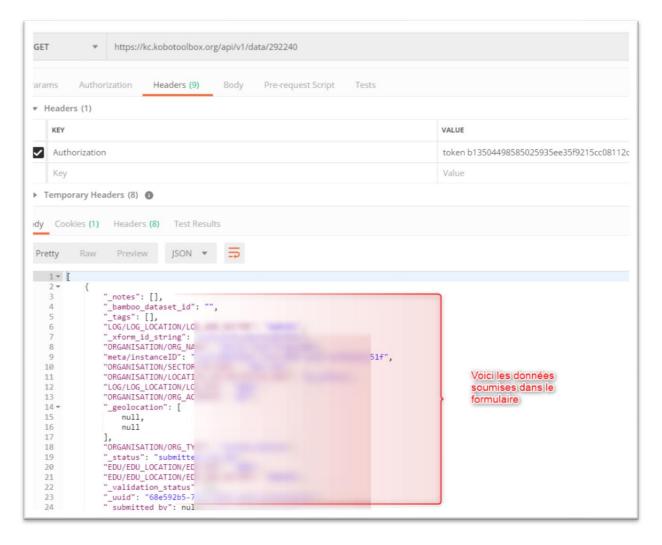

Start typing "aut" and select "authorization"

Write "Token" "space" and "the value of the token"

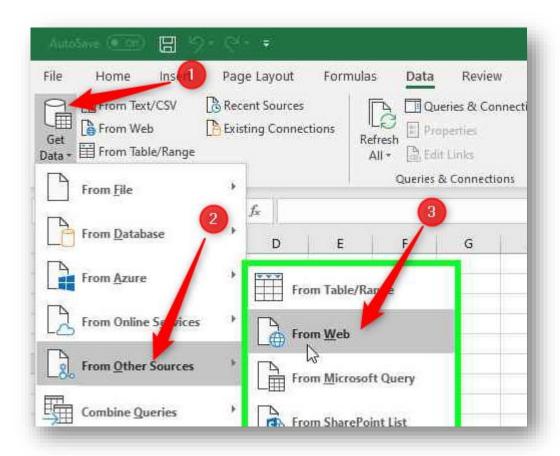

It shows the data of your form

The test is good now:

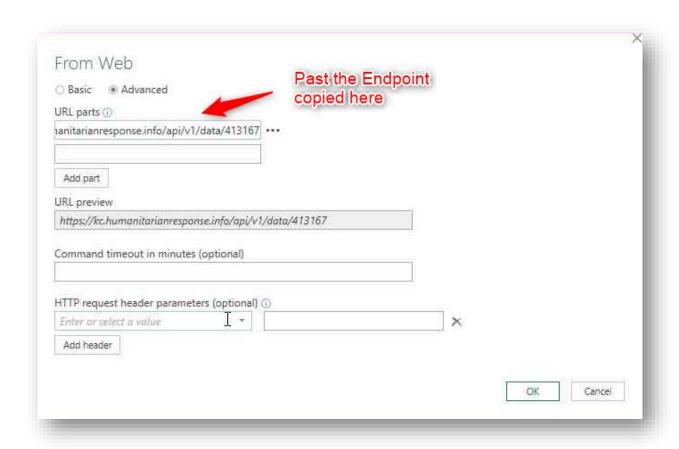

Copy the Endpoint of this step and the token they will be used on Excel to recover the data

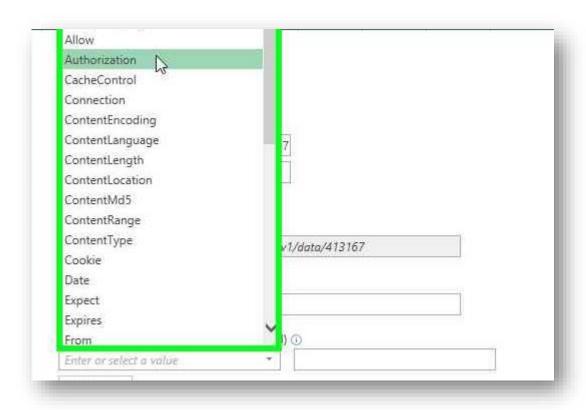

b. Connect Excel to Kobo data

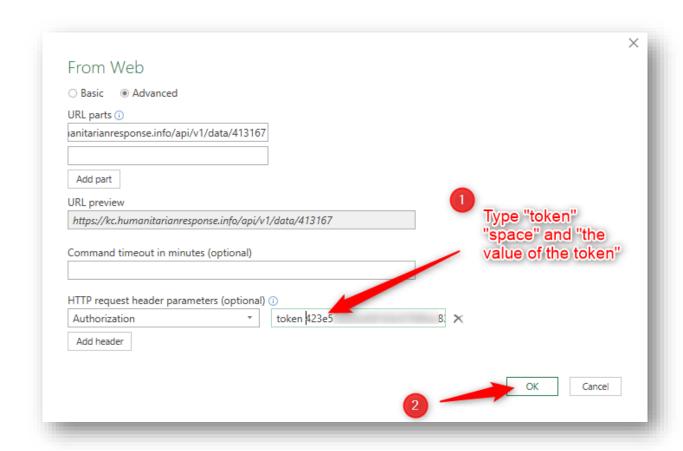

Open Excel

Cliquer sur « Se connecter »
